July 2019 VWC - NCO update & IMC Annual Meeting Final Planning

Mon, 07/08/2019 - 11:35am — jdowning

Monday July 8th at 3pm (east coast)/ 12pm (west coast).

We are planning to have a discussion with Marty Downs first off to get an update on the activities at the NCO (as they will not be represented at our meeting in Tacoma). After that, we would like to continue our discussion and planning for the breakout group activities when we meet up in less than two weeks.

Also, we at IMEXEC are working to plan future water coolers and would love any ideas or suggestions on topics that would be informative and thought provoking. Something new that we would like to try is to plan a series of water coolers to initially take place quarterly with the goal of covering different approaches and tools used by site IM's to accomplish key job duties. This idea, we hope, will be a continuation of activities that are designed to help and initiate newer information managers but should also be enlightening to all IM's. At each of these VWC there would be a central topic, such as generating EML, field data apps or sensor network communications, where a few IM's with different approaches could give a brief introduction and description of their particular systems and then the

whole group would participate in a discussion about the various nuances and requirements of different systems. We would like to try this at our water cooler scheduled for August 12, 2019 so please let me know what you think would be good topics or would be willing to share how you do something.

Connection Information:

Join from PC, Mac, Linux, iOS or Android: <https://ucsb.zoom.us/j/419931872>
