May 2013: Best Practices for Pasta

Mon, 04/29/2013 - 11:43am — kvanderbilt

Doodle poll: <http://www.doodle.com/hgy8vfssxup6w7s2> [1]

Three information managers have spent quite a bit of time with PASTA. They will use this water cooler to share some of the information they have accumulated.

See the PPT attached.

To preview the EML doc transformed to HTML, use this form: <https://portal-s.lternet.edu/nis/metadataPreviewer.jsp> [2]

Caveats:

data links will not work!

EML is not going into pasta!

EML is not being checked!

if your EML has illegal HTML characters: you will see a red message

if you transform invalid XML: you will see a blank page

Keep in mind, that this is a PREVIEW, only, so you can view your developmental EML document as it will appear in a web browser. This link should only be shared among LTER information managers, and they should be made aware of the caveats.
