January 2019 VWC - 40 year Review IM Self-Study document

Tue, 01/15/2019 - 12:03pm — jdowning

The IMC will kick off the first water cooler of the year next Monday with a discussion of the LTER 40-year review and the IM self-study component. Here is the connection and initial topic information:

Date: Monday, January 14th at 12 pm PDT / 3 pm EDT

Connection: <https://ucsb.zoom.us/j/419931872> [1]

The current thinking is a two-page whitepaper highlighting how great IM is at the NETWORK level. The NSF review will focus on: (1) why do we need long-term, and (2) why do we need a network? The IMC, almost more than any other, can address these topics. Focus of the decadal review is progress in the last 10 years (2008-2018) and the IMC has several key accomplishments. Bob Waide is also editing a book about LTER, with Susan Stafford writing the IM section, and we want to be involved in this process.

Initial discussion generated a list of some cross-site products and a few concepts to be highlighted in the paper:

climdb/hydrodb

Vocab

GCE Toolbox

EML

Unit Registry

DEIMS

PASTA

EDI/data center

What are the concepts we should plan to emphasize:

How was the network connected to development of product?

What is the network use of the product?

What is the use outside of the LTER of the product?
